

Nitin Sivakumar

React JS Front-End Developer

nitin.nadar5@gmail.com || +91 8879597942 || [Portfolio](#) || [LinkedIn](#) || [GitHub](#)

Diva (East), Thane, Mumbai, Maharashtra.

Skills:

Frontend Skills: React Js, Redux Toolkit, HTML, CSS, JavaScript

UI Library: Bootstrap, Material UI

Backend Skills: SQL, Git Bash

Work Experience:

Xpentra Pvt. Ltd.

React Js Frontend Developer | May 2024 – Present

Project: Xpentra Application

- **Bug Fixing & Debugging:** Efficiently resolve issues raised by the testing team or based on business requirements, leveraging deep understanding of component lifecycle and functionality to ensure optimal performance.
- **Reusable & Dynamic JSX Components:** Maintain and enhance JSX components, ensuring they are reusable and adaptable to real-time environments.
- **Responsive Design Implementation:** Convert InDesign/Figma designs into responsive React.js components, ensuring compatibility across various devices and screen sizes.
- **CSS & Tailwind CSS:** Utilize CSS and Tailwind CSS to make components flexible, responsive, and visually appealing, adapting to different screen adjustments.
- **API Integration & State Management:** Manage API calls using Redux/Toolkit, bringing applications to life with seamless state management and secure JWT tokenization for user authorization.

Claptek Pvt. Ltd.

Executive Developer | October 2022 – April 2024

Project: Audit System Application (React JS Frontend Developer).

- **Dynamic User Interface Development:** Spearheaded the development and maintenance of dynamic user interfaces using React.js, prioritizing a seamless and intuitive user experience.

- **Innovative Component Design:** Successfully designed and implemented a highly adaptable component that dynamically adjusts to changes in the 'Form Category,' showcasing problem-solving skills and adaptability.
- **Cross-Functional Collaboration:** Collaborated closely with cross-functional teams to deliver front-end solutions that align with project goals, ensuring smooth integration of front-end components with back-end systems for a cohesive application experience.

Project: "Audit Automation" for The Client Bank of Baroda.

- The project involves creating an "Audit Form" using the Metrics Stream platform to store data in the Bank's database. The "Audit Form" functionality is provided within Metrics Stream, offering developers the capability to design workflows and write JavaScript in the rules section for any calculation or conditional scripts.
- Additionally, Oracle Functions and Packages were developed with the select queries or subqueries which will return HTML tags and values, followed by user requirement, to generate "Audit Reports" for the auditors.
- This project also involves writing complex Cursors, Subqueries, Inline queries, with clauses, and Join conditions in the ORACLE DB to obtain customer requirement reports in a tabular format.

Knowledge Global Works Pvt. Ltd.

Associate E-Pub Developer | October 2019 – September 2022

Project: Sheridan Articles & Journal.

- The project involves tagging and designing customer raw data articles and journals into a web page and PDF format using HTML, XML, and CSS.
- Quality control procedures include fetching and cross-verifying the data in accordance with the customer's checklist.

Project:

Food Menu: (React Js). [view code](#)

- This project is a fully developed frontend application using React.js, alongside HTML, CSS, and JavaScript.
- Dynamic Component and Interactive user Interface, to render each and every Food Card.
- Incorporated an Redux to manage state effectively.

Transfer Files: (React Js). [view code](#)

- User can Upload he/her file in the application by giving it a file "Name", "Description" and to whom he/she wants to send this uploaded file simply mention their "User ID" at the send to option field. The files get pop at the end user inbox.

- Fetching the Data through the API using Redux. I made this API with the Node Express JS.

Tic Tac Toe: (React Native Expo.) [view code](#)

- Build the game logic using JavaScript and React Hooks (e.g., “useState” and “useEffect”).

Calculator: (React Native Expo.) [view code](#)

- Using React Native Paper components for a sleek and modern user interface.
- Implemented JavaScript functions with a logic to handle diverse mathematical operations.

Education:

2016 - 2019 | Kirti College

B.Sc. Computer Science - CGPI: 5.53

2013 – 2015 | Dr Antonio Da Silva Jr. College

HSC - 49.38%

2013 | KJ Khilnani High School

SSC - 55.82%

Profile:

Date of Birth: **5th April 1997**

Languages: **English, Hindi, Marathi & Tamil**

Hobbies: **illustration, Volleyball**
